Information being sought on mill by Monticello City

The City of Monticello is requesting assistance from it's residents, past and present.

Information is needed to determine the impact of uranium processing in our community since 1941. Facts needed would include, but not be limited to, health problems or deaths related situations of family and friends, employment at mill site, wind blown tailings or corrosion.

A public hearing is planned by the city at the Park Pavilion April 13, 1993 at 6 p.m. All are invited to attend.

Those unable to attend can still provide information by calling 587-2271 or writing the City of Monticello, Box 457, Monticello, Utah 84535.
